SUMMARY

Junior developer who enjoys building practical web applications.

I have experience working on projects covering frontend, backend and deployment. I'm especially interested in backend development and how applications are deployed and maintained.

WORK EXPERIENCE

FULLSTACK DEVELOPER INTERN

Montel Intergalactic

11/2024 - 04/2025

- Worked on an internal system built with **Python** and **Django**, implementing new functionality and performing maintenance tasks.
- Developed an internal backend service using Python and **FastAPI** to handle URL redirections.
- Maintained and developed the company website using **Vue.js** and **Strapi**, implementing new features and content updates.
- Deployed applications to production using **Docker** and **Kubernetes**.
- Learned the fundamentals of professional software development while working in an international development team, contributing from implementation to production.
